

**TERM - 1 MATHS**  
**CLASS: XII**  
**CHAPTER 1 : RELATION AND FUNCTION**  
**WORKSHEET: 1**

|     |  |
|-----|--|
| Q1  | The function $f : A \rightarrow B$ defined by $f(x) = 4x + 7, x \in R$ is<br>(a) one-one<br>(b) Many-one<br>(c) Odd<br>(d) Even  |
| Q2  | The number of bijective functions from set A to itself when A contains 6 elements is<br>(a) 6<br>(b) $(6)^2$<br>(c) $6!$<br>(d) $2^6$  |
| Q3  | Let L denote the set of all straight lines in a plane. Let a relation R be defined by $l R m$ if and only if l is perpendicular to $m \forall l, m \in L$ . Then R is<br>(a) reflexive only<br>(b) Symmetric only<br>(c) Transitive only<br>(d) Equivalence relation |
| Q4  | Let N be the set of natural numbers and the function $f : N \rightarrow N$ be defined by $f(n) = 2n + 3 \forall n \in N$ . Then f is<br>(a) injective<br>(b) surjective<br>(c) bijective<br>(d) None of these  |
| Q 5 | The function $f : R \rightarrow R$ defined by $f(x) = 3 - 4x$ is<br>(a) Onto<br>(b) Not onto<br>(c) Not one-one<br>(d) None of these   |

|     |  |
|-----|--|
| Q 6 | Let $f(x) = \frac{x-1}{x+1}$ , then $f(f(x))$ is<br>(a) $1/x$<br>(b) $-1/x$<br>(c) $1/(x+1)$<br>(d) $1/(x-1)$  |
| Q 7 | Set A has 3 elements and the set B has 4 elements. Then the number of injective mappings that can be defined from A to B is<br>(a) 144<br>(b) 12<br>(c) 24<br>(d) 64   |
| Q 8 | The maximum number of equivalence relations on the set $A = \{1, 2, 3\}$ are<br>(a) 1<br>(b) 2<br>(c) 3<br>(d) 5   |
| Q 9 | Let us define a relation R in R as $aRb$ if $a \geq b$ . Then R is<br>(a) an equivalence relation<br>(b) reflexive, transitive but not symmetric<br>(c) symmetric, transitive but not reflexive<br>(d) neither transitive nor reflexive but symmetric                |
| Q10 | Let $A = \{1, 2, 3\}$ and consider the relation $R = \{(1, 1), (2, 2), (3, 3), (1, 2), (2, 3), (1, 3)\}$ . Then R is<br>(a) reflexive but not symmetric<br>(b) reflexive but not transitive<br>(c) symmetric and transitive<br>(d) neither symmetric, nor transitive |
| Q11 | Let $A = \{1, 2, 3, \dots, n\}$ and $B = \{a, b\}$ . Then the number of surjections from A into B is<br>(a) $2^n$<br>(b) $2^n - 2$<br>(c) $2^n - 1$<br>(d) none of these   |
| Q12 | Let $f : R \rightarrow R$ be defined by $f(x) = 1/x, \forall x \in R$ . Then f is<br>(a) one-one   |

|     |  |
|-----|--|
|     | <p>(b) onto<br/> (c) bijective<br/> (d) f is not defined</p>   |
| Q13 | <p>Which of the following functions from <math>Z</math> into <math>Z</math> are bijective?</p> <p>(a) <math>f(x) = x^3</math><br/> (b) <math>f(x) = x + 2</math><br/> (c) <math>f(x) = 2x + 1</math><br/> (d) <math>f(x) = x^2 + 1</math></p>  |
| Q14 | <p>Let <math>f : R \rightarrow R</math> be defined by <math>f(x) = x^2 + 1</math>. Then, pre-images of 17 and <math>-3</math>, respectively, are</p> <p>(a) <math>\phi, \{4, -4\}</math><br/> (b) <math>\{3, -3\}, \phi</math><br/> (c) <math>\{4, -4\}, \phi</math><br/> (d) <math>\{4, -4\}, \{2, -2\}</math></p>  |
| Q15 | <p>For real numbers <math>x</math> and <math>y</math>, define <math>xRy</math> if and only if <math>x - y + \sqrt{2}</math> is an irrational number. Then the relation <math>R</math> is</p> <p>(a) reflexive only<br/> (b) Symmetric only<br/> (c) Transitive only<br/> (d) None of these</p>   |
| Q16 | <p>Consider the non-empty set consisting of children in a family and a relation <math>R</math> defined as <math>aRb</math> if <math>a</math> is brother of <math>b</math>. Then <math>R</math> is</p> <p>(a) symmetric but not transitive<br/> (b) transitive but not symmetric<br/> (c) neither symmetric nor transitive<br/> (d) both symmetric and transitive</p> |
| Q17 | <p>If a relation <math>R</math> on the set <math>\{1, 2, 3\}</math> be defined by <math>R = \{(1, 2)\}</math>, then <math>R</math> is</p> <p>(a) reflexive<br/> (b) Symmetric<br/> (c) Transitive<br/> (d) None of these</p>   |
| Q18 | <p>Let <math>R</math> be a relation on the set <math>N</math> of natural numbers denoted by <math>nRm \Leftrightarrow n</math> is a factor of <math>m</math> (i.e. <math>n \mid m</math>). Then, <math>R</math> is</p>   |

|            |  |
|------------|--|
|            | <p>(a) Reflexive and symmetric<br/> (b) Transitive and symmetric<br/> (c) Equivalence<br/> (d) Reflexive, transitive but not symmetric</p>   |
| <b>Q19</b> | <p>Let <math>S = \{1, 2, 3, 4, 5\}</math> and let <math>A = S \times S</math>. Define the relation <math>R</math> on <math>A</math> as follows:<br/> (a, b) <math>R</math> (c, d) iff <math>ad = cb</math>. Then, <math>R</math> is<br/> (a) reflexive only<br/> (b) Symmetric only<br/> (c) Transitive only<br/> (d) Equivalence relation</p> |
| <b>Q20</b> | <p>Let <math>R</math> be the relation "is congruent to" on the set of all triangles in a plane is<br/> (a) reflexive<br/> (b) symmetric<br/> (c) symmetric and reflexive<br/> (d) equivalence</p>  |
| <b>Q21</b> | <p>Total number of equivalence relations defined in the set <math>S = \{a, b, c\}</math> is<br/> (a) 5<br/> (b) <math>3!</math><br/> (c) 23<br/> (d) 33</p>  |
| <b>Q22</b> | <p>The relation <math>R</math> is defined on the set of natural numbers as <math>\{(a, b) : 2a = b\}</math>. Then, <math>R</math> is given by<br/> (a) <math>\{(2, 1), (4, 2), (6, 3), \dots\}</math><br/> (b) <math>\{(1, 2), (2, 4), (3, 6), \dots\}</math><br/> (c) <math>R</math> is not defined<br/> (d) None of these</p>                |
| <b>Q23</b> | <p>Let <math>X = \{-1, 0, 1\}</math>, <math>Y = \{0, 2\}</math> and a function <math>f : X \rightarrow Y</math> defined by <math>y = 2x^4</math>, is<br/> (a) one-one onto<br/> (b) one-one into<br/> (c) many-one onto<br/> (d) many-one into</p>   |

|         |  |
|---------|--|
| Q<br>24 | <p>Let <math>g(x) = x^2 - 4x - 5</math>, then</p> <p>(a) <math>g</math> is one-one on <math>\mathbb{R}</math><br/> (b) <math>g</math> is not one-one on <math>\mathbb{R}</math><br/> (c) <math>g</math> is bijective on <math>\mathbb{R}</math><br/> (d) None of these</p>   |
| Q<br>25 | <p>The mapping <math>f : \mathbb{N} \rightarrow \mathbb{N}</math> is given by <math>f(n) = 1 + n^2</math>, <math>n \in \mathbb{N}</math> when <math>\mathbb{N}</math> is the set of natural numbers is</p> <p>(a) one-one and onto<br/> (b) onto but not one-one<br/> (c) one-one but not onto<br/> (d) neither one-one nor onto</p> |
| Q<br>26 | <p>The function <math>f : \mathbb{R} \rightarrow \mathbb{R}</math> given by <math>f(x) = x^3 - 1</math> is</p> <p>(a) a one-one function<br/> (b) an onto function<br/> (c) a bijection<br/> (d) neither one-one nor onto</p>  |
| Q<br>27 | <p>Let <math>A = \{x : -1 \leq x \leq 1\}</math> and <math>f : A \rightarrow A</math> is a function defined by <math>f(x) = x x </math> then <math>f</math> is</p> <p>(a) a bijection<br/> (b) injection but not surjection<br/> (c) surjection but not injection<br/> (d) neither injection nor surjection</p>                      |
| Q<br>28 | <p>The domain of the function <math>f(x) = \frac{1}{\sqrt{\{ \sin x \} + \{ \sin(\pi + x) \}}}</math> where <math>\{ \}</math> denotes fractional part, is</p> <p>(a) <math>[0, \pi]</math><br/> (b) <math>(2n + 1)\pi/2, n \in \mathbb{Z}</math><br/> (c) <math>(0, \pi)</math><br/> (d) None of these</p>                          |
| Q<br>29 | <p>Range of <math>f(x) = \sqrt{(1 - \cos x)} \sqrt{(1 - \cos x)} \sqrt{(1 - \cos x)} \dots \dots \infty</math></p> <p>(a) <math>[0, 1]</math><br/> (b) <math>(0, 1)</math><br/> (c) <math>[0, 2]</math><br/> (d) <math>(0, 2)</math></p>   |

|                 |  |
|-----------------|--|
| <p>Q<br/>30</p> | <p>The greatest integer function <math>f(x) = [x]</math> is<br/> (a) One-one<br/> (b) Many-one<br/> (c) Both (a) &amp; (b)<br/> (d) None of these</p>  |
|                 | <p>CASE STUDY : 1</p> <p>Anu and Chhutki are playing Ludo at home during Covid-19. While rolling the dice, Anu's sister Nikki observed and noted that the possible outcomes of the throw every time belong to set <math>\{1,2,3,4,5,6\}</math>. Let A be the set of players while B be the set of all possible outcomes.</p>  <p><math>A = \{A, C\}, B = \{1,2,3,4,5,6\}</math></p> |
| <p>Q 1</p>      | <p>Let <math>R : B \rightarrow B</math> be defined by <math>R = \{(x, y) : y \text{ is divisible by } x\}</math> is<br/> a. Reflexive and transitive but not symmetric<br/> b. Reflexive and symmetric and not transitive<br/> c. Not reflexive but symmetric and transitive<br/> d. Equivalence</p>   |
| <p>Q 2</p>      | <p>Nikki wants to know the number of functions from A to B. How many number of functions are possible?</p>   |

|     |  |
|-----|--|
|     | <p>a. <math>6^2</math></p> <p>b. <math>2^6</math></p> <p>c. <math>6!</math></p> <p>d. <math>2^{12}</math></p>  |
| Q 3 | <p>Let R be a relation on B defined by <math>R = \{(1,2), (2,2), (1,3), (3,4), (3,1), (4,3), (5,5)\}</math>. Then R is</p> <p>a. Symmetric</p> <p>b. Reflexive</p> <p>c. Transitive</p> <p>d. None of these</p>  |
| Q 4 | <p>Nikki wants to know the number of relations possible from A to B. How many numbers of relations are possible?</p> <p>a. <math>6^2</math></p> <p>b. <math>2^6</math></p> <p>c. <math>6!</math></p> <p>d. <math>2^{12}</math></p>   |
| Q 5 | <p>Let <math>R: B \rightarrow B</math> be defined by <math>R = \{(1,1), (1,2), (2,2), (3,3), (4,4), (5,5), (6,6)\}</math>, then R is</p> <p>a. Symmetric</p> <p>b. Reflexive and Transitive</p> <p>c. Transitive and symmetric</p> <p>d. Equivalence</p>   |
|     | <p><b>CASE STUDY : 2</b></p> <p>An organization conducted bike race under 2 different categories-boys and girls. Totally there were 250 participants. Among all of them finally three from Category 1 and two from Category 2 were selected for the final race. Ravi forms two sets B and G with these participants for his college project.</p> <p>Let <math>B = \{b_1, b_2, b_3\}</math> <math>G = \{g_1, g_2\}</math> where B represents the set of boys selected and G the set of girls who were selected for the final race.</p> <p>Ravi decides to explore these sets for various types of relations and functions</p> |

- Q 1 Ravi wishes to form all the relations possible from B to G. How many such relations are possible?
- a.  $2^5$
  - b.  $2^6$
  - c. 0
  - d.  $2^3$
- Q 2 Let  $R: B \rightarrow B$  be defined by  $R = \{(x, y): x \text{ and } y \text{ are students of same sex}\}$ , Then this relation R is \_\_\_\_\_
- a. Equivalence
  - b. Reflexive only
  - c. Reflexive and symmetric but not transitive
  - d. Reflexive and transitive but not symmetric
- Q 3 Ravi wants to know among those relations, how many functions can be formed from B to G?
- a.  $2^2$
  - b.  $2^{12}$
  - c.  $3^2$
  - d.  $2^3$

|-----|---|
| Q 4 | <p>Let <math>R: B \rightarrow G</math> be defined by <math>R = \{ (b_1, g_1), (b_2, g_2), (b_3, g_1) \}</math>, then R is _____</p> <p>a. Injective<br/>b. Surjective<br/>c. Neither Surjective nor Injective<br/>d. Surjective and Injective</p>   |
| Q 5 | <p>Ravi wants to find the number of injective functions from B to G. How many numbers of injective functions are possible?</p> <p>a. 0<br/>b. 2!<br/>c. 3!<br/>d. 0!</p>  |
|     | <p>CASE STUDY : 3</p> <p>Raji visited the Exhibition along with her family. The Exhibition had a huge swing, which attracted many children. Raji found that the swing traced the path of a Parabola as given by <math>y = x^2</math>. Answer the following questions using the above information.</p> |
| Q 1 | <p>Let <math>f: R \rightarrow R</math> be defined by <math>f(x) = x^2</math> is _____</p> <p>a. Neither Surjective nor Injective<br/>b. Surjective<br/>c. Injective<br/>d. Bijective</p>  |
| Q 2 | <p>Let <math>f: N \rightarrow N</math> be defined by <math>f(x) = x^2</math> is _____</p> <p>a. Surjective but not Injective<br/>b. Surjective<br/>c. Injective<br/>d. Bijective</p>  |
| Q 3 | <p>Let <math>f: \{1, 2, 3, \dots\} \rightarrow \{1, 4, 9, \dots\}</math> be defined by <math>f(x) = x^2</math> is _____</p> <p>a. Bijective</p>   |

|     |  |
|-----|--|
|     | <p>b. Surjective but not Injective</p> <p>c. Injective but Surjective</p> <p>d. Neither Surjective nor Injective</p>   |
| Q 4 | <p>Let <math>f : N \rightarrow R</math> be defined by <math>f(x) = x^2</math>. Range of the function among the following is _____</p> <p>a. <math>\{1, 4, 9, 16, \dots\}</math></p> <p>b. <math>\{1, 4, 8, 9, 10, \dots\}</math></p> <p>c. <math>\{1, 4, 9, 15, 16, \dots\}</math></p> <p>d. <math>\{1, 4, 8, 16, \dots\}</math></p> |
| Q 5 | <p>The function <math>f: Z \rightarrow Z</math> defined by <math>f(x) = x^2</math> is _____</p> <p>a. Neither Injective nor Surjective</p> <p>b. Injective</p> <p>c. Surjective</p> <p>d. Bijective</p>  |

### Answers

1. Answer:  
(a) one-one
2. Answer:  
(c) 106!
3. Answer:  
(b) Symmetric only
4. Answer:  
(a) injective
5. Answer:  
(a) Onto
6. Answer:  
(b)  $-1/x$
7. Answer:  
(c) 24
8. Answer:  
(d) 5

9. Answer:  
(b) reflexive, transitive but not symmetric
10. Answer:  
(a) reflexive but not symmetric
11. Answer:  
(b)  $2^n - 2$
12. Answer:  
(d) f is not defined
13. Answer:  
(b)  $f(x) = x + 2$
14. Answer:  
(c)  $\{4, -4\}, \emptyset$
15. Answer:  
(a) reflexive only
16. Answer:  
(d) both symmetric and transitive
17. Answer:  
(a) transitive
18. Answer:  
(d) Reflexive, transitive but not symmetric
19. Answer:  
(d) Equivalence relation
20. Answer:  
(d) equivalence
21. Answer:  
(a) 5
22. Answer:  
(b)  $\{(1, 2), (2, 4), (3, 6), \dots\}$
23. Answer:  
(c) many-one onto
24. Answer:  
(b) g is not one-one on R
25. Answer:  
(c) one-one but not onto
26. Answer:  
(c) a bijection
27. Answer:  
(a) a bijection
28. Answer:  
(d) None of these

29. Answer:

(c)  $[0, 2]$

30. Answer:

(b) Many-one

### Case Study 1

#### ANSWERS

1. (a) Reflexive and transitive but not symmetric

2. (a) 62

3. (d) None of these three

4. (d) 212

5. (b) Reflexive and Transitive

### Case Study 2

#### ANSWERS

1. (a) 26

2. (a) Equivalence

3. (d) 23

4. (b) Surjective

5. (a) 0

### Case Study 3

#### ANSWERS

1. (a) Neither Surjective nor Injective

2. (C) Injective

3. (a) Bijective

4. (a)  $\{1, 4, 9, 16, \dots\}$

5. (a) Neither Injective nor Surjective
