

Chapter-5
Worksheet-2

Q. 1: Rise in water level of rivers, lakes and ponds leads to:

- (a) Flood
- (b) Drought
- (c) Water scarcity
- (d) Dry lands

Q. 2: Floods may cause extensive damage to:

- (a) Crops
- (b) Property and human life
- (c) Domestic animals
- (d) All of the above

Q. 3: Why does the water table of a place become lower?

- (a) When trees are planted
- (b) When there is drought
- (c) When there is cyclone and flood
- (d) All of the above

Q. 4: Which of the following statement is incorrect?

- (a) Water evaporates plants, animals and oceans
- (b) Animals living in Water are not harmed during the floods
- (c) Vegetation cannot thrive during droughts
- (d) Water available for human us is very limited during harvesting

Q. 5: Soil erosion takes place due to:

- (a) Floods
- (b) Drought
- (c) Transpiration
- (d) All of the above

Q. 6: What is rain water harvesting?

- (a) Storing ground water present in the well
- (b) Stopping the cultivation of crops to save water
- (c) The seeping of water into the ground
- (d) Collecting rainwater and use it for future use

Q. 7: “Catch water where it falls” is the basic idea behind:

- (a) Recycling of water
- (b) Making dams to store water
- (c) Rain water harvesting
- (d) Condensation of water vapour

Q. 8: Rain Water harvesting is a method employed to:

- (a) Stop soil erosion in a place
- (b) Raise the water table of a place
- (c) Decrease drought at a place
- (d) Decrease floods at a place

Q. 9: Why is water scarcity increasing day by day?

- (a) Water cycle has stopped functioning

- (b) The total amount of water on earth has decreased
- (c) The consumption of water has increased
- (d) There is an increasing frequency of floods

Q. 10. Which of the following is polluted by man or factories?

- (a) Pond
- (b) Rivers
- (c) Ground water
- (d) All of the above
