## Chapter-4 <br> Basic Geometrical Ideas <br> Worksheet - 1

1. A $\qquad$ is an exact position or location on a plane surface.
a. Point
b. Line Segment
c. Line
d. Intersecting lines
2. A line segment has $\qquad$ endpoints.
a. 0
b. 1
c. 2
d. 3
3. A line contains $\qquad$ points in it.
a. 0
b. 1
c. 100
d. Infinite
4. Intersecting lines have $\qquad$ common points among them?
a. 0
b. 1
c. 2
d. 3
5. Two or more parallel lines have $\qquad$ common points among them?
a. 0
b. 1
c. 2
d. 3
6. A ray has $\qquad$ endpoints.
a. 0
b. 1
c. 2
d. 3
7. A curve which does not cross itself is called a -
a. Simple curve
b. Non-simple curve
c. Closed curve
d. Open curve
8. A curve which crosses itself at least once is called a-
a. Simple curve
b. Non-simple curve
c. Closed curve
d. Open curve
9. Match the column:

| Column A | Column B |
| :---: | :---: |
| a. Square | i. |
| b. Perimeter of triangle | ii. |
| Sum of length of its three <br> sides. |  |
| c. Internal angle of a rectangle |  |
| d. as rectangle. |  |
|  | Distance between two |
| parallel lines |  |$\quad$ iv. | Always constant. |
| :--- |

10. State true or false in the following statements:
a. An angle is formed by two rays.
b. A triangle cannot have more than 3 vertices.
c. The sum of vertices of a triangle and a pentagon is 9 .
d. Collinear points are always equidistant from each other.
11. What is a 'Line segment'?
12. What is a "Line'?
13. Describe 'Parallel lines' in detail?
14. What is the definition of a 'Curve'?
15. What is the meaning of 'Region of a curve'?
16. Make a list of polygons which have number of sides from 3 to 10 ?
17. What is a "Quadrilateral'?
18. What is a 'Circle'?
19. Explain 'Radius' of a circle?
20. Explain how the circumference of a circle will change if its radius is reduced to half?
